In-class Quiz friday January 31, 2020

Quiz 02

PROBLEM GROUP 1 English and Math

- 1. Write simple, succinct English that means $(P \land Q) \lor (\neg P \land \neg Q)$, where P means "I like potatoes", Q means "I'm on a quest"
- 2. Rewrite "I'll win if neither hurt nor tired" as an expression over atomic propositions. Include both a mapping from symbols to propositions and the final expression.

PROBLEM GROUP 2 Direct Proof

For each of the following claims, write out a series of steps, one per line, where the first and last lines are given in the problem and each line other than the first is an application of **one** equivalence rule to the line above it (a list of equivalence rules is on the next page). Write the name of each rule next to the line it creates.

3. Prove that
$$P(P \rightarrow Q) \equiv \neg (\neg Q \rightarrow \neg P)$$

4. Prove that
$$A \to (B \to C) \equiv (A \land B) \to C$$

Symbols

Concept	Java/C	Python	This class	Bitwise	Other
true	true	True	\top or 1	-1	T, tautology
false	false	False	\perp or 0	Θ	F, contradiction
not P	!p	not p	$\neg P$ or \overline{P}	~p	
\overline{P} and Q	p && q	p and q	$P \wedge Q$	p & q	$PQ, P \cdot Q$
P or Q	p q	p or q	$P \vee Q$	p q	P+Q
$P \operatorname{xor} Q$	p != q	p != q	$P\oplus Q$	p ^ q	$P \veebar Q$
\overline{P} implies Q			$P \rightarrow Q$		$P\supset Q, P\Rightarrow Q$
P iff Q	p == q	p == q	$P \leftrightarrow Q$		$P \Leftrightarrow Q, P \operatorname{xnor} Q$

Axioms: Equivalence rules

- associativity and commutativity of \land , \lor , and \oplus ; commutativity of \leftrightarrow
- double negation: $\neg \neg P \equiv P$
- simplification: $P \land \bot \equiv \bot$, $P \land \top \equiv P$, $P \lor \bot \equiv P$, $P \lor \top \equiv \top$, and $P \land P \equiv P \lor P \equiv P$
- distribution: $A \wedge (B \vee C) \equiv (A \wedge B) \vee (A \wedge C)$ and $A \vee (B \wedge C) \equiv (A \vee B) \wedge (A \vee C)$
- De Morgan: $\neg (A \land B) \equiv (\neg A) \lor (\neg B)$ and $\neg (A \lor B) \equiv (\neg A) \land (\neg B)$
- $\bullet \ \ \text{definitions:} \ \boxed{A \to B \equiv (\neg A) \lor B}, \ \boxed{(A \leftrightarrow B) \equiv (A \to B) \land (B \to A)} \ \ \text{and} \ \boxed{(A \oplus B) \equiv (A \lor B) \land \neg (A \land B)}$

You may use the space below for scratchwork. It will not be graded.
