

CS Enrollment Spring 2022

CS Graduate Enrollment Dates

Course	Start of registration	November 15	November 22
CS 6xxx, 7xxx, and 8xx	CS, CPE, and EE graduate students	Also open to Data Science graduate students	Open to all

CS 1110, CS 1111, and CS 1112

- CS 1110 is open to anyone (i.e., people with and without programming experience). Each week there are both lectures and lab.
- CS 1111 is only open to people with substantial programming experience who do not believe they are ready for CS 2110. There are no separate labs to attend.
- CS 1112 is only open to people without prior programming experience. Because lab is integrated in every course meeting, there are no separate lab meetings. Students are expected to attend all class meetings.

CS Undergraduate Enrollment Dates

- CS courses will be open to all students, but the registration periods for many courses are initially restricted to students with majors that require the course.
- The below table specifies the relaxation of restrictions. The CS Department does not control the exact times that course restrictions will be relaxed.
- Know that SIS does not allow you to join a waiting list until your enrollment restriction is relaxed.

Course	Start of registration	November 15	November 22
CS 1010	Open to non-SEAS students		
CS 1110, 1111, and 1112	Open to SEAS, CogSci, Math, and 1st or 2nd-year CLAS	Open to all
