Call for Papers

The Sixth Great Lakes Symposium on VLSI

March 22-23, 1996, Ames, Iowa, USA

sponsored by IEEE Computer Society, IEEE Circuits and Systems Society, and Iowa State University, in cooperation with IEEE Signal Processing Society and ACM SIGDA

The sixth Great Lakes Symposium on VLSI will be hosted by Iowa State University at Ames, Iowa. The purpose of the symposium is to provide a relaxed atmosphere for exchange of ideas and to promote research in the field of VLSI. Original and unpublished articles on all aspects of VLSI are invited. Both theoretical and experimental contributions are welcome. Topics of interest include but are not limited to:

1. Physical Design
2. Synthesis and Verification
3. Testing, Design for Testability
4. Low Power Design
5. High-level Synthesis
6. High Frequency Circuit Design
7. Hardware/Software Codesign
8. Field Programmable Gate Arrays
9. Multichip Modules
10. Analog and Mixed Signal ICs
11. Specialized VLSI Architectures
12. Applications (HDTV, ATM, etc.)

Paper Submissions:
Prospective authors are invited to submit **FOUR** copies of a review package including:

- A Title Page containing title, most relevant topic number(s), name and affiliations of all author(s), telephone number, fax number and e-mail address of the contact person.
- A 100-word Abstract.
- A Manuscript, not exceeding 4,000 words, clearly stating its contributions.

Special Sessions:
Proposals are solicited for organized sessions on a common theme. Proposals should be submitted with a list of papers to be included by October 2, 1996 for an initial approval. All papers submitted to special sessions will be reviewed using the same guideline as submissions to regular sessions.

Tutorials:
Tutorial sessions are planned for March 21 1995. Two page proposals on topics of current interest in VLSI are solicited.

Important Dates:

Special Session Proposals due	:	2 October, 1995
Deadline for Paper Submissions	:	10 November 1995
Notification of Acceptance	:	20 December, 1995
Camera-Ready Papers due	:	19 January, 1996

Send Submissions to:

Liang-Fang Chao, GLS-VLSI '96
201 Coover Hall
Department of Electrical and Computer Engineering
Iowa State University
Ames, IA 50011, USA
E-mail : `lfc@iastate.edu`
Phone : (515) 294-4192
Fax: : (515) 294-8432

Steering Committee
N. Sherwani *(Intel)*

Program Committee
Co-chairs:
Liang-Fang Chao *(Iowa State U.)*
Yu Hen Hu *(U. of Wisconsin)*
Members:
Jacob A. Abraham *(U. of Texas, Austin)*
Vishwani D. Agrawal *(AT & T Bell Labs)*
Magdy A. Bayoumi *(U. of Southwestern Louisiana)*
Sreejit Chakravarty *(SUNY, Buffalo)*
Mark Greenstreet *(U. of British Columbia)*
Larry Jones *(Motorola)*
David Knapp *(Synopsys)*
Enrico Macii *(Politecnico di Torino, Italy)*
Keshab K. Parhi *(U. of Minnesota)*
Robert M. Owens *(Penn State U.)*
Miodrag Potkonjak *(C & C Research Labs., NEC)*
Alice Parker *(U. of Southern California)*
Irith Pomeranz *(U. of Iowa)*
Gabriel Robins *(U. of Virginia)*
Edwin Sha *(U. of Notre Dame)*
Naveed Sherwani *(Intel)*
Steve Trimberger *(Xilinx)*
D. F. Wong *(U. of Texas, Austin)*

Special Sessions
Sachin Sapatnekar *(Iowa State U.)*

Publicity
Marwan Hassoun *(Iowa State U.)*

Local Arrangements
Edward Lee *(Iowa State U.)*
Akhilesh Tyagi *(Iowa State U.)*

Industrial Liasons
Delaine Sather (Rockwell)
Jer-Jaw Hsu (Cadence)
