

Welcome to CS 4640 Programming Languages for Web Applications

Why We Care

1,953,018,114

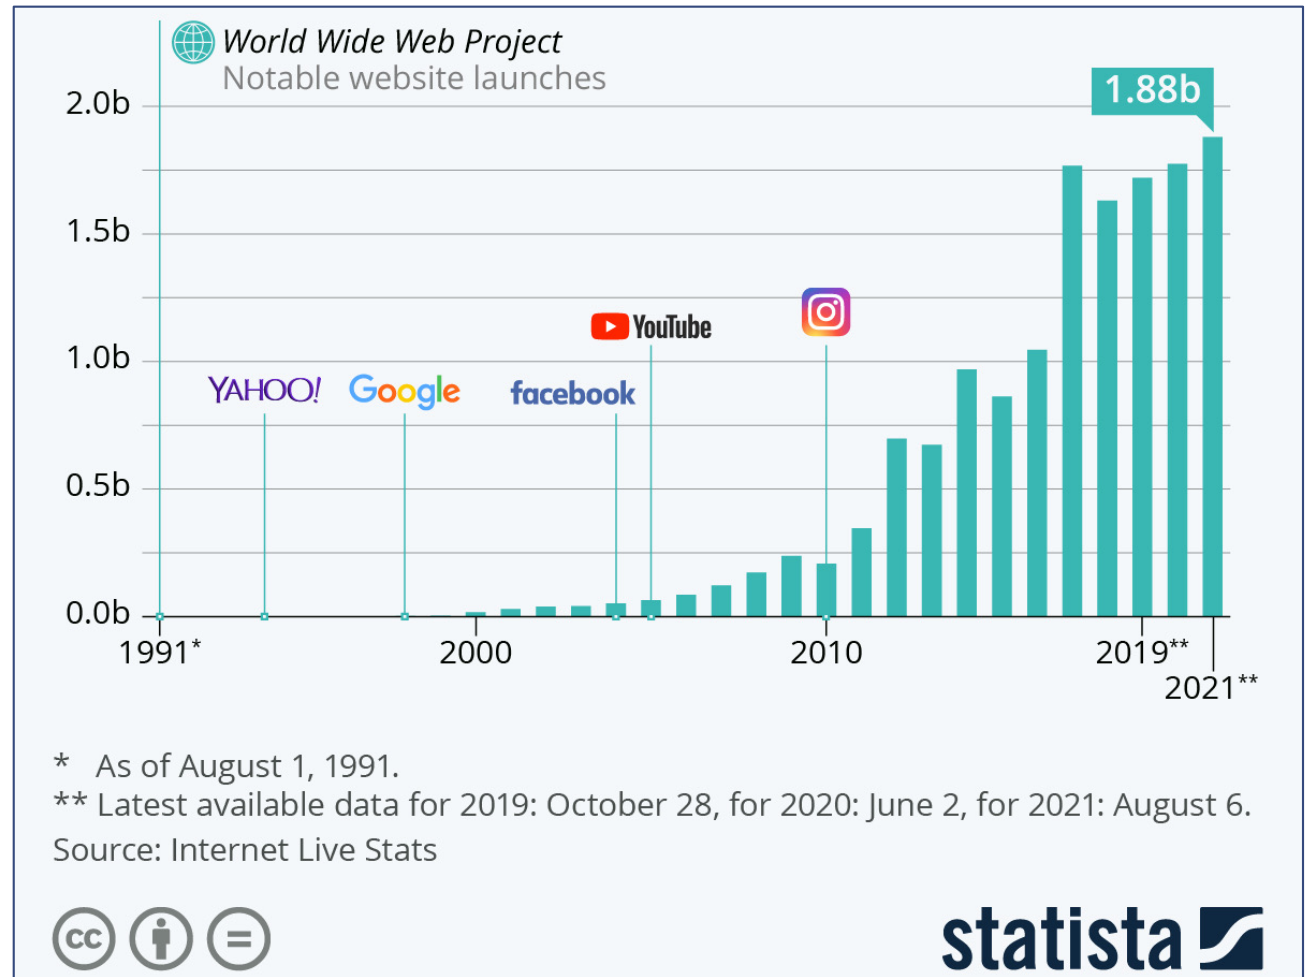

Total number of Websites

5,310,792,628

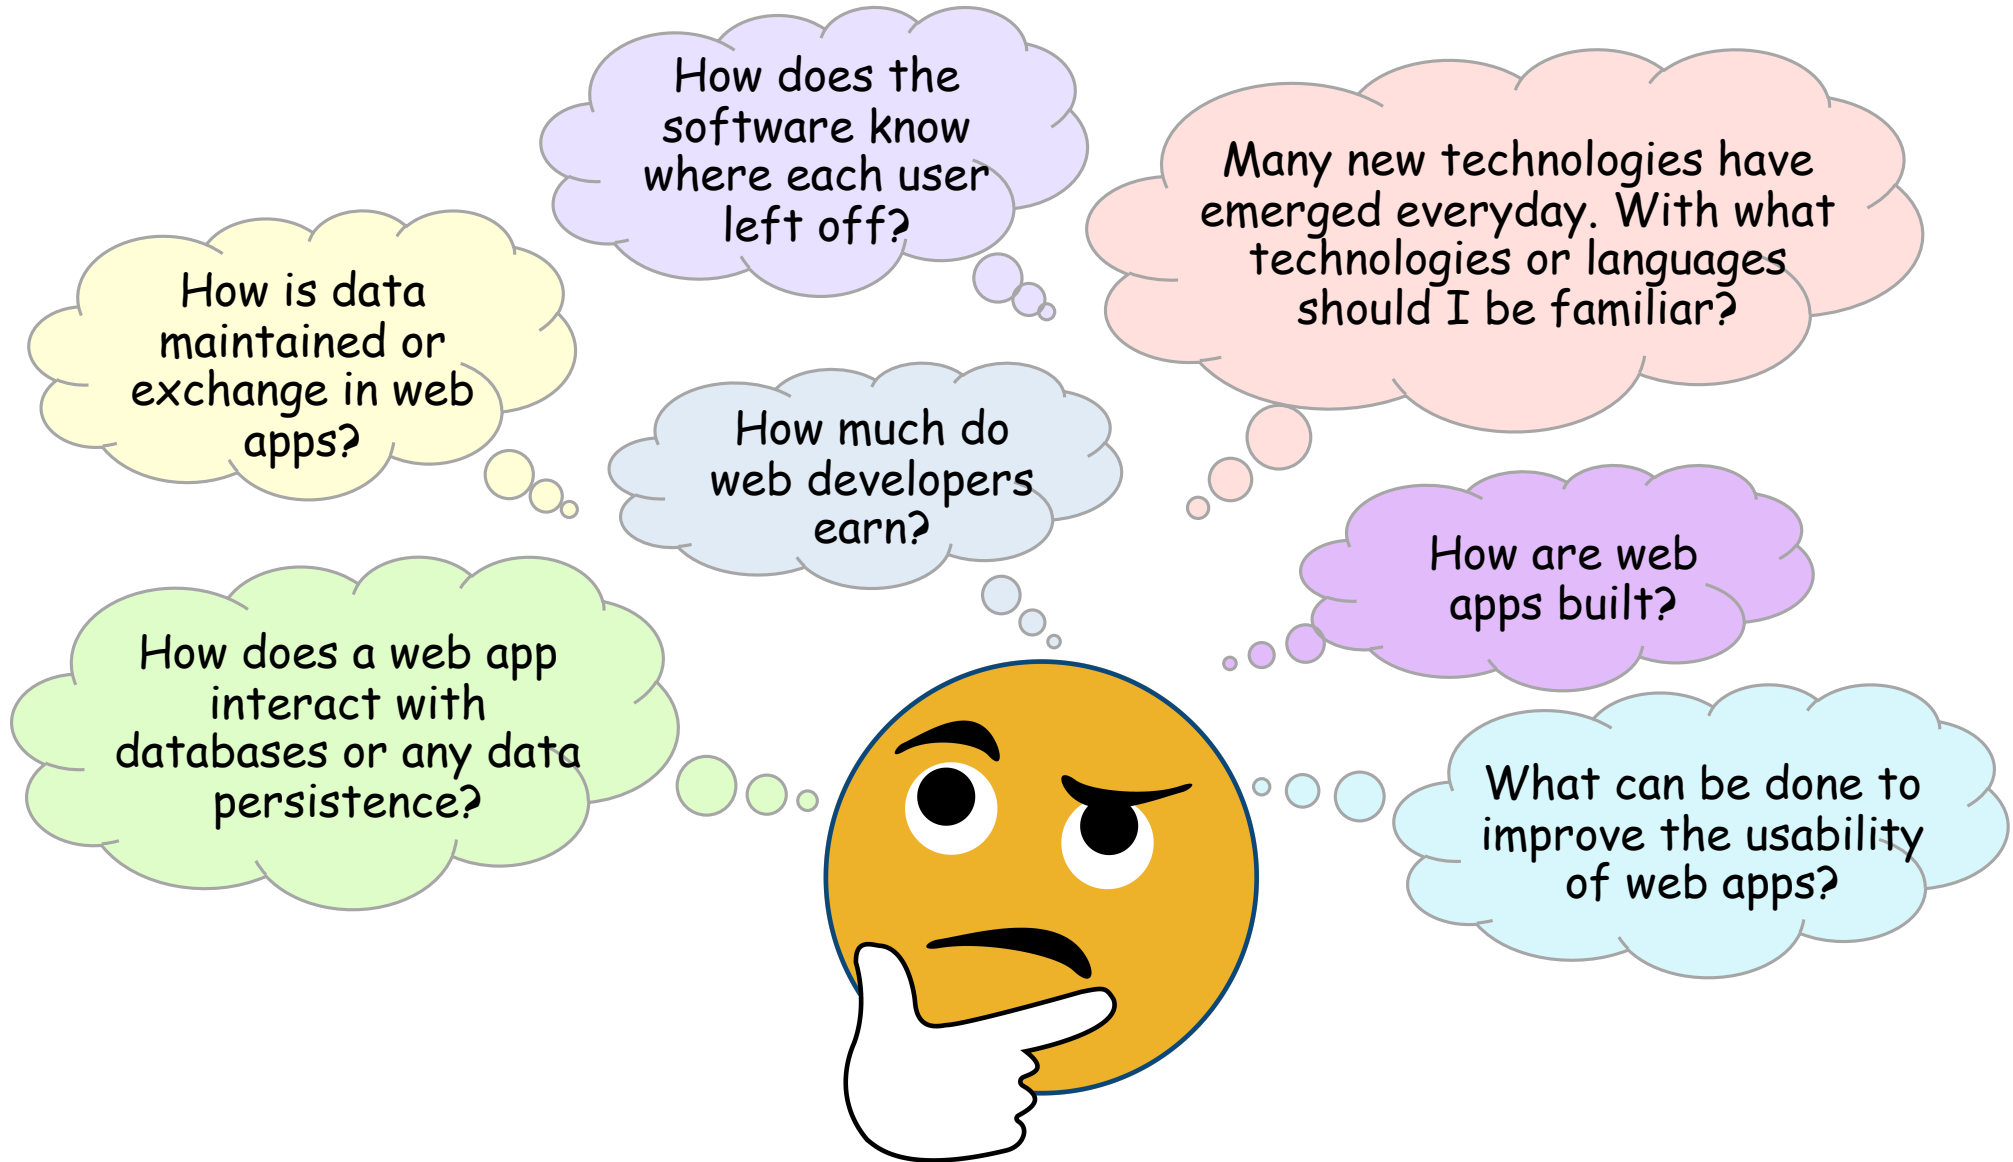

Internet Users in the world

[Ref: <https://www.internetlivestats.com/>
last accessed: 21-May-2022]

[Ref: <https://www.statista.com/chart/19058/number-of-websites-online/>]

Have You Ever Wondered

Web Development (General View)

Front End Development

\$50k to \$118k,
avg = \$77k

(developer / engineer)

- UI/UX design, usability
- Web design
- Responsive design

- Client side
- HTML, CSS, JS (and JS libraries, frameworks)
- Fixed huge amount of data, no database interaction

Full-Stack Development

\$55k to \$118k,
avg = \$80k (developer)

\$68k – \$131k,
avg = \$92k (engineer)

- Variety of skills (both front end and back end)
- Horizontal technology development (+)
- Not expert in particular skill (-)

Back End Development

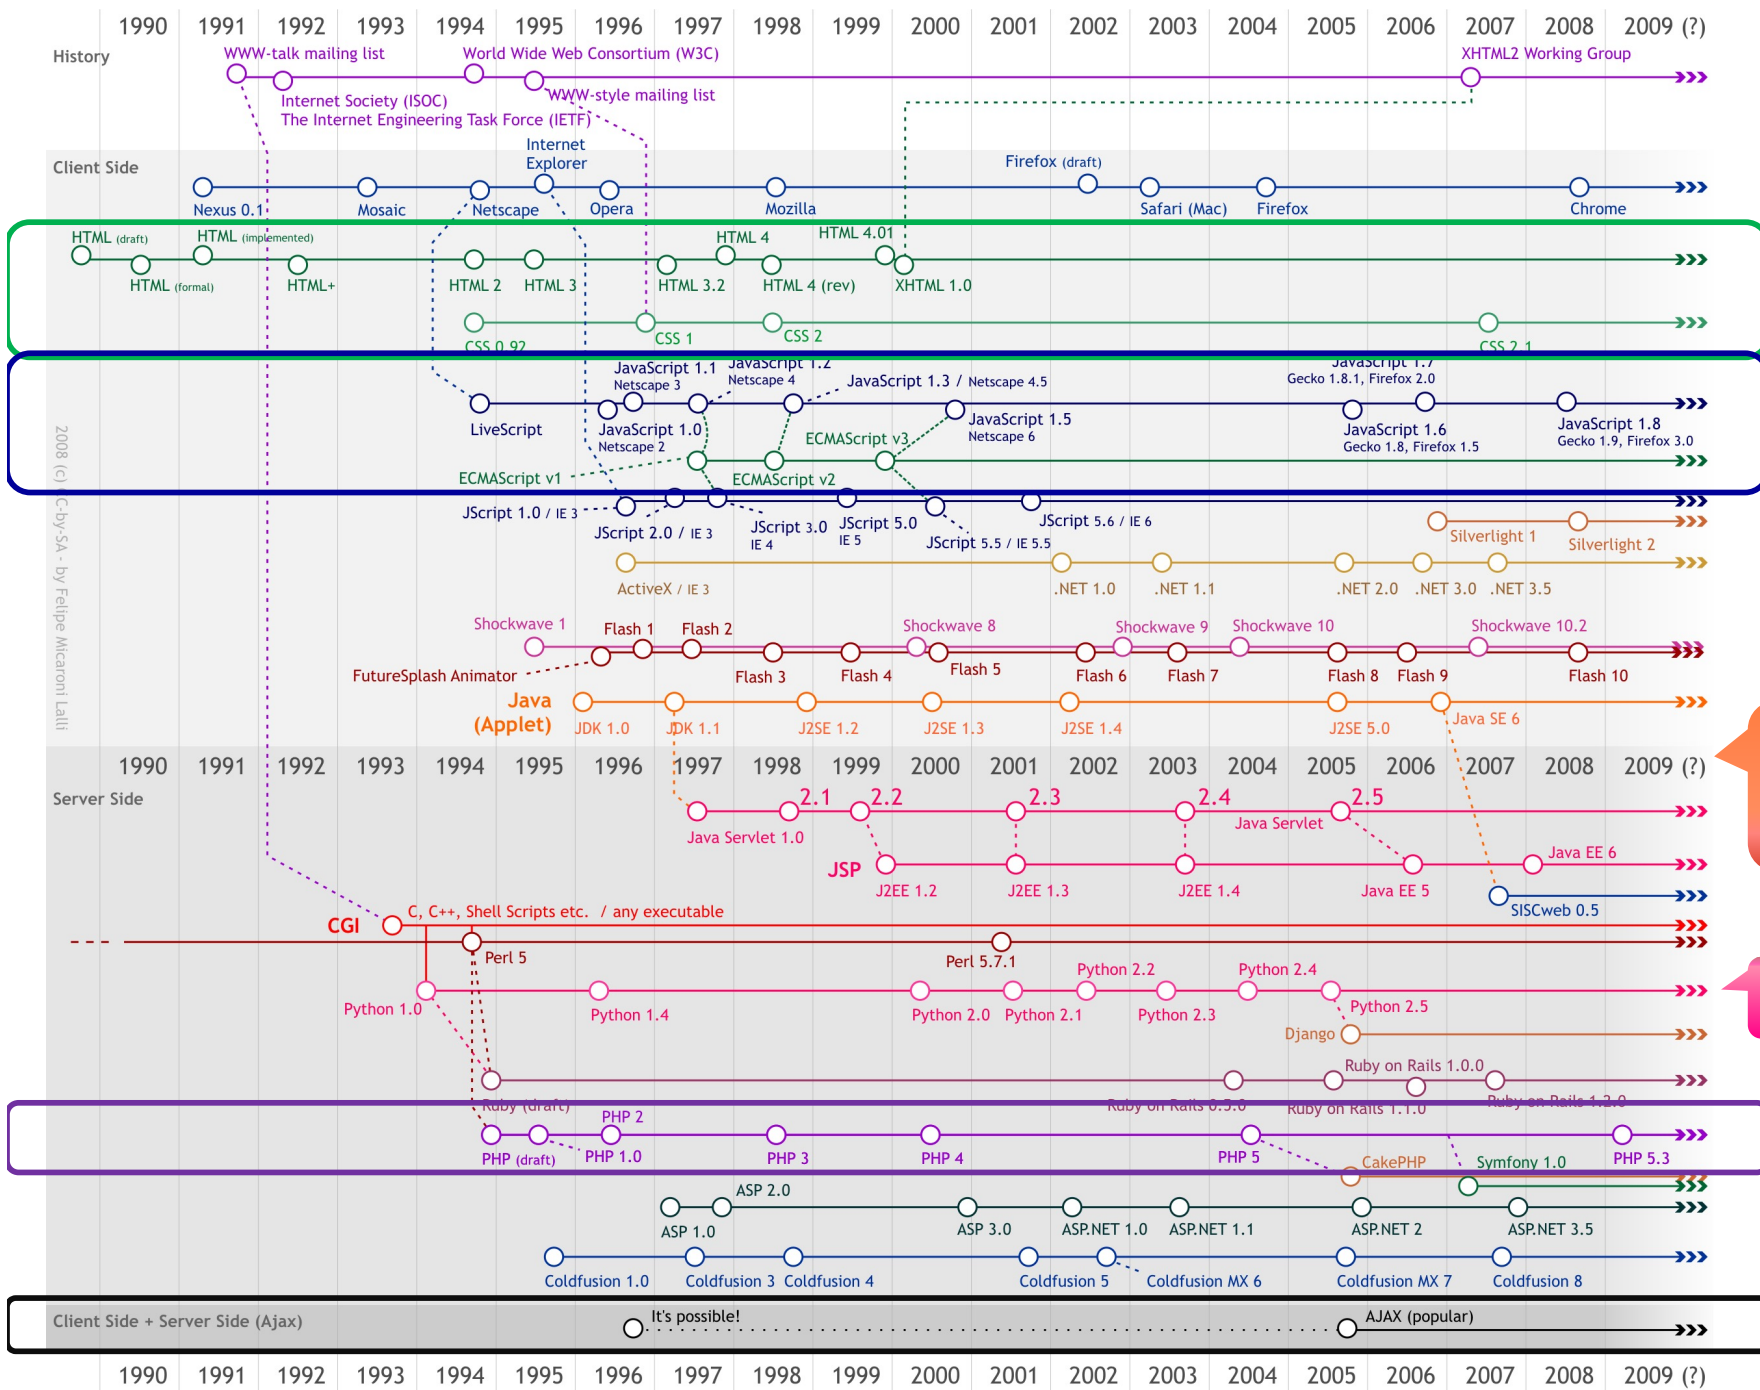

\$54k to \$131k,
avg = \$87k

(developer / engineer)

- Server side
- Speed, performance, scalability, security, availability, accessibility, reliability
- Business logic
- Java, PHP, Python, Ruby on Rails, and back end frameworks
- Database interaction

- Server administration
- Database, data science

 [Thanks to Prof. Hott for the input and content]

Which Frameworks To Use

[Ref: <https://github.com/mraible/history-of-web-frameworks-timeline>]

What This Course is About

- Split web software **into two aspects**:
 - The **interface** aspect
 - The **software** aspect
- The **interface** runs on the **client** side (web client)
 - HTML, CSS, JavaScript
 - Achieving **usability** is a key, and very difficult
- The **software** runs on the **server** side (web server)
 - PHP
 - The key to other quality criteria (reliability, etc.)
- Other technologies
 - AJAX
 - Angular
 - XML, JSON
 - Database (MySQL)
 - Bootstrap

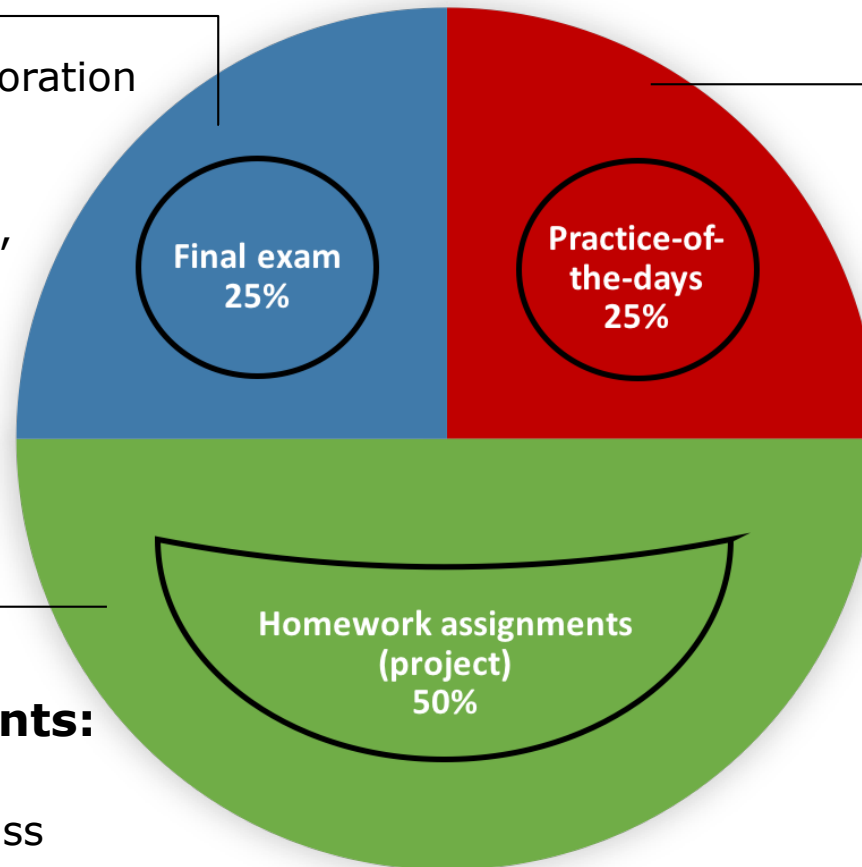

I Hope to Help You

- Understand the importance of the usability aspect
 - **Outside-in** vs inside-out
 - Design usable web user interfaces
- Understand and be able to program web apps
 - **Client side** and **Server side**
 - **Front end framework** and **Single Page Application (SPA)**
- Understand how **data** stored and shared in web apps
- Understand and able to utilize asynchronous processing
 - Improve **interaction** between web servers and web clients
 - Improve **usability**

What You Will Do

Final exam:

- **Individual**, no collaboration
- Comprehensive
- Take home
- **Open** book, your note, your IDE, course site, class recordings
- **Close** any forms of discussion or collaboration, Google, ...

Practice-of-the-days:

- 5 POTDs, Wed and Thu
- Grade on done/not done
- Due next day, 1pm EST
- No late submission

Homework assignments:

- Team of 2
- Weekly, due before class
- -25% per 24 hours late
- Not accepted after 48 hours past due
- Design & develop a full-stack web app (prototype) & present your project

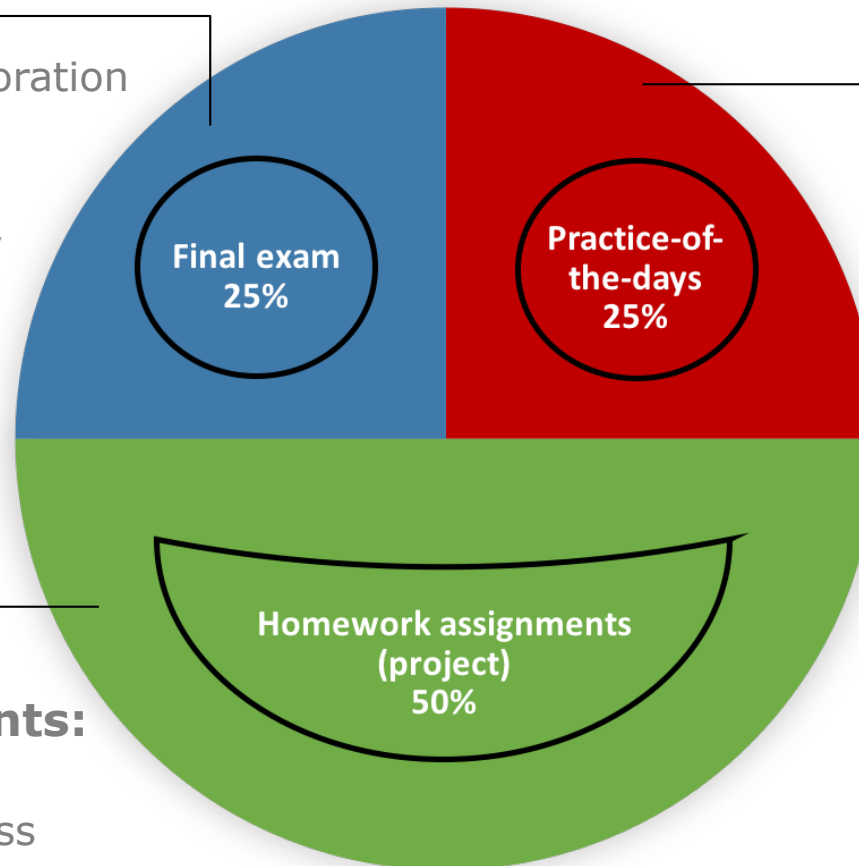

Hands-on activities:

- Almost every meeting
- No submission

How Your Learning will be Evaluated

Final exam:

- **Individual**, no collaboration
- Comprehensive
- Take home
- Open book, your note, your IDE, course site, class recordings
- Close any forms of discussion or collaboration, Google, ...

Practice-of-the-days:

- 5 POTDs, Wed and Thu
- Grade on done/not done
- Due next day, 1pm EST
- No late submission

Homework assignments:

- Team of 2
- Weekly, due before class
- -25% per 24 hours late
- Not accepted after 48 hours past due
- Design & develop a full-stack web app (prototype) & present your project

Hands-on activities:

- Almost every meeting
- No submission

By default, grades will not be bumped, rounded, or curved in this course

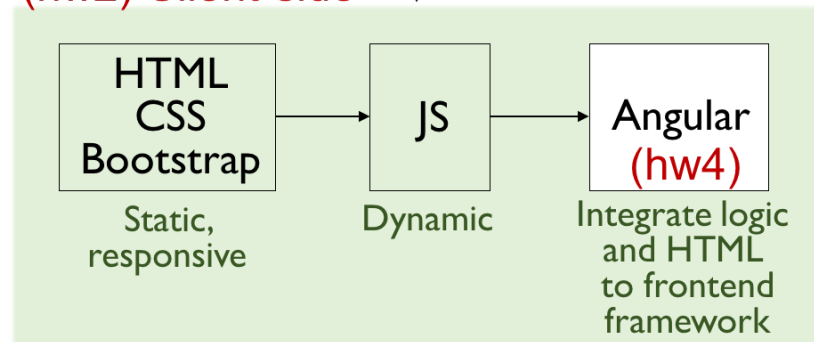

Project Overview

(hw1) Project proposal

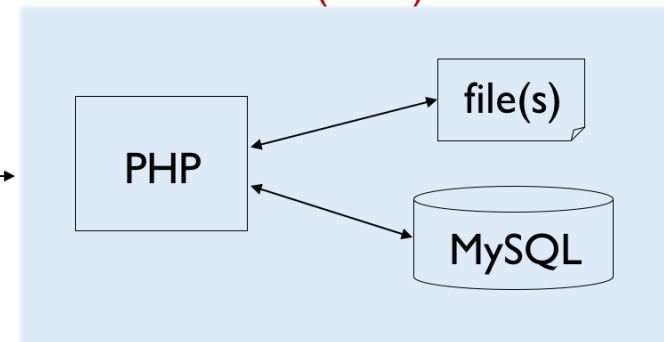

Optional: web service
Information visualization

(hw2) Client-side

(hw3) Server-side

(EC)

Ajax

Improve interaction and usability

(hw4) Final deliverable

These are components that you will implement. You may design the system using any software architectural style(s) of your choice (such as page-centric, dispatcher, model-view-control, or combination) to create single-page app, multiple-pages app, or combination. Your system must include client-side and server-side components.

Prerequisites

- CS 2150 or DSA2, with C- or better (or COVID CR)
- Programming skills
- Basic HTML is expected
- Software installation and troubleshooting skills
- Time management skills
- Ability to work independently

Prerequisites define what you need to know **before** taking a class to succeed in the class. Please do not ask if you can take the class without the prerequisites. I have to advise **against** it

The CS student services staff will monitor and remove students not meeting prerequisites in courses in which they are enrolled

More Info to Help You Learn

- **Class URL:** <http://www.cs.virginia.edu/~up3f/cs4640/>
- **Textbook:** No text required, additional references will be provided
- **Learning style:** In-person, lab-style work
- **Class recordings:** In Collab > Class Recordings, available 24-48 hours after class (by default)
- **Emails:** Use your UVA email and check it regularly
include **CS 4640** in subject
- **Masking:** Not required, but highly encouraged,
no eating & no drinking in class

Share Ideas, Get Help, Just Talk

- **Instructor office hours:** virtual, Zoom link on class website
- **TA office hours:** *TBD*
- **Piazza:** <https://piazza.com/virginia/summer2022/cs4640/home>
 - You should have gotten an invitation today
 - If not, check your UVA email or check with me
- Questions should be posted to an appropriate thread
 - Answered by instructor, TA, and your peers
 - Public: general questions and answers
 - Private: Grade/homework-specific questions – instructor and TA
- **Help yourself learn:** <https://forms.office.com/r/QANZdDnegF>

You are the Main Driver!!

"You" are the main driver of your learning success.

Your engagement and participation is the most important aspect of your learning experience.

You are encouraged to do all the activities, try all technologies, experience all languages ... and do beyond the project's minimum requirements!!
