Coverage-based Test Design: Candy Tasting Testing
Worksheet #1

Come up with one criterion to test the candy

Derive a set of test requirements

Consider your test requirements above, record which test requirements are satisfied by your test set

Consider your test requirements above, record which test requirements are satisfied by another team’s tests

Compute the coverage level of your tests

Compute the coverage level of another team’s test
Coverage-based Test Design: Candy Tasting Testing

Worksheet #2

Design a set of test cases that satisfies the requirements

Record the number of failed test cases

Record the number of test cases that are infeasible (make a note, why they are infeasible)
