

Peer-review 1

1. What larger problem is the paper attempting to address? How important is that problem? Who will care if the problem is solved?
2. What technical aspect is the paper attempting to address?
3. What is the hypothesis?
4. Does the paper mention why current solutions are not sufficient? Is it convincing that a new approach is needed?
5. Does the system seem like a plausible method for addressing the challenges presented? Is the scope of the system reasonable for a semester long or six-month long project?
6. Is the system (broadly) related to the Internet of Things or the topics covered (or to be covered) in the class?
7. Imagine an evaluation section was added to the paper. What figure would you most like to see that would convince you the system works? Is it a CDF, line chart, or another type of figure? What are the X and Y axes?
8. What are the strengths of the paper? What did you like?
9. How could the paper be improved?
