CS Enrollment Policy for Fall 2022

CS courses are eventually open to all students, but the registration periods for many courses are initially restricted to students with majors that require the course. A table specifying the relaxation of restrictions follows. The CS Department does not control the exact times that course restrictions will be relaxed. SIS will not allow you to add yourself to a waiting list until your enrollment restriction is relaxed. You are encouraged to add to the waiting list as soon as you can — waiting lists often shrink and many students, if not most, eventually get in.

During the summer the University limits registration to incoming first-year and transfer students. In particular, CS courses are limited to SEAS and CS majors. General availability of CS courses is phased in during August.

- Starting early August, all first-year students can enroll in CS 1xxx and 2xxx courses.
- CS 3xxx and 4xxx courses will be limited to CS and CPE transfers until mid-August.
- CS courses will be open to all starting mid-August.

Enrollment Dates

Course	Start of registration	April 21st	April 28nd
CS 1010	Open to non-SEAS students		
CS 1110 and 1111	Open to all
